Subject: Draft weekly report to the Administrator
Attachments: Weekly Report to the Administrator 12-10-18.docx

Attached is the draft weekly report, and it is also copied in the text below. (Report is relatively short this week.)

**REGION 2 WEEKLY HIGHLIGHTS TO ADMINISTRATOR
WEEK OF 12/10/18**

Hot Issues:

Limetree Bay Terminals, USVI: On 11/27 LBT submitted a Plantwide Applicability Limit (PAL) permit application. A PAL is a pollutant-specific, source-wide emission limitation, expressed in tons per year, which provides a voluntary alternative for complying with PSD permitting program requirements. The PAL will allow LBT the flexibility to make changes within the facility to adapt to market demands, without any deterioration to the air quality, by operating under the PAL. The 300-page application covers SO₂, NO_x, VOC, CO, PM, PM₁₀, and PM_{2.5}. R2 staff will meet with LBT on 12/11 to discuss the application.
